Dear Ladies and Gentlemen,

IKOM Bau is entering its 17th round. On January 30th and 31st, we would like to offer companies in the construction and architecture industry the opportunity to present themselves to students at the Technical University of Munich and, in doing so, address potential employees. To this end, we are hosting the IKOM Bau 2023 career fair at the TU Munich’s downtown campus.

We, the IKOM team, have been working voluntarily for years to shorten the distance between students and industry. We enjoy providing our fellow students with an overview of the industries as well as an easier entry into the professional world. Therefore, we organize workshops and excursions for students of all disciplines in addition to our career fairs.

After finally being allowed to invite students back on site again at the beginning of this year with IKOM Bau 2022 and after mastering the IKOM Life Science 2022 and IKOM 2022, we are now heading for the next career fair with a correspondingly motivated team. The experience with online career fairs of the past Corona years has shown us that personal conversation is difficult to replace. So, even if the infection situation is uneasy in January, we will do our best to hold the event in face-to-face form. Of course, health and safety of all participants are our top priority. We are confident though, as we have been able to gather a great deal of know-how in the context of infection control through IKOM Bau 2022.

Are You looking for …
• career starters and graduates?
• interested interns or working students?
• students who would like to write a paper or thesis?

Then IKOM Bau is just the right platform for you to get in touch with students and graduates of all Munich universities and especially the Technical University of Munich. In addition to your booth at IKOM Bau, we offer you the opportunity to present your company in our online catalog as well as the option to conduct one-on-one interviews with students selected by you.

If you have any questions, naturally we are happy to answer them.
We are looking forward to meeting you!

With kind regards

Paul Thäle
Project Leader IKOM Bau

Our Maxim

We connect people. Personally.

Our goal is to establish contacts between students and companies. We are students of all disciplines who volunteer to organize career fairs and other events such as excursions, workshops and lectures that are free of charge for students.

We are united by team spirit, initiative, and the desire to make it easier for our fellow students to enter professional life. We want to use our many years of experience and at the same time promote new ideas and projects and constantly develop ourselves. For the success of IKOM, it is important to work professionally and responsibly. This is only possible through good communication and strong cohesion.

Cooperations

Bayerische Ingenieurekammer-Bau

Bayerische Ingenieurekammer-Bau will once again be a partner of IKOM Bau next year. As a corporation under public law, the Chamber represents the interests of its more than 6700 members. These are the engineers of all departments of planning and construction in Bavaria, whose professional interests are represented by the Chamber.

Munich Universities

The „Münchener Recruiting Allianz – MRA“ is a cooperation of the on-campus trade fairs of the three major Munich universities: The FKG at the Ludwig-Maximilian-Universität (LMU), the IKOM at the Technischen Universität München (TUM) and the HOKO at Hochschule München (HM).
