

 **IKOM** Start-Up

**We connect people.
Personally.**

28th June 2023

Faculty of Mathematics/Informatics • Technical University of Munich

Dear Sir or Madam,

On June 28th, 2023, IKOM Start-Up will take place for the ninth time in the Faculty of Mathematics and Computer Sciences at the Technical University of Munich. The forum is specifically designed for young companies like yours to present your concept and recruit potential new employees.

We, as IKOM, have set ourselves the mission to promote the exchange between companies and students and thus simplifying their transition into working life. To achieve that goal, we offer a plethora of events, in addition to our career forums, such as excursions, workshops, and lectures, free of charge for students of all disciplines. As an example, our largest career forum, the IKOM, will be held parallel to the IKOM Start Up at the neighbouring TUM School of Engineering and Design.

Our forum offers you the ideal opportunity to address a broad spectrum of potential applicants from all disciplines.

Is Your start-up looking for...

- young professionals and graduates?
- interested interns or working students?
- students, who would like to write their thesis or term paper?

In that case, the IKOM Start-Up is an excellent platform for your aspiring company to get in touch with interested, highly qualified, and motivated students and graduates of the Technical University of Munich and other universities of Munich. In addition to your booth at the IKOM Start-Up, we offer you the opportunity to conduct interviews with students selected by you to achieve an even more intensive exchange with suitable candidates. Furthermore, we offer you the opportunity to present the concept of your company in a receptive atmosphere on our pitch stage and thus allow for a more comprehensive understanding by the students.

If you have any further questions, do not hesitate to contact us.

We look forward to meeting you!

With kind regards,

Lisa Gremmel
Project Manager IKOM Start-Up
IKOM Career Forum
